SUMMARY

E-commerce logistics and key account specialist with 6+ years across marketplaces and carriers (Shopee, GHN, J&T Express, Maersk). Combines strong SQL analytics with hands-on AI automation — building LLM agent workflows and automated reporting pipelines, and vibe coding complete internal apps (GHN, Interdist) that replace manual reporting. Proven record of improving operational KPIs and turning complex data into decisions for senior management.

EXPERIENCE

Giao Hang Nhanh (GHN) — Key Account Solution / Data Analyst *Oct 2025 – Present*

- Trusted advisor to strategic e-commerce accounts (Shopee, TikTok Shop): own volume vs. forecast (FC/AOP) tracking, SLA adherence and weekly performance reviews; deliver data-backed recommendations adopted by both clients and internal operations.
- Designed and built an AI reporting pipeline using LLM agent skills and prompt engineering (Claude) that turns raw SQL/CSV extracts into standardized Word/HTML client reports — cutting manual report time by ~70%, standardizing report quality across the team, and running unattended on a scheduled n8n / Google Apps Script loop with anomaly alerts.
- Vibe-coded and shipped, end-to-end, an internal operations dashboard (React, Supabase, Vercel; built with Claude, logic verified by me) tracking Shopee pickup and delivery on-time by region, hub and lane, with email-allowlist access control and audit logging; a second team embedded it into their control-tower app instead of rebuilding the same view.
- Built advanced Trino SQL pipelines that attribute each SLA breach to the responsible warehouse or journey leg, enabling targeted corrective actions with operations.
- Lead resolution of high-severity escalations across functions, protecting service continuity and quality for key clients.

Interdist — Data & Product Owner (part-time, remote) *May 2026 – Present*

- Moved brand-client sales reporting from scattered Excel files onto a governed central database, designing the schema and business rules (effective-date pricing, target allocation by store operating calendar).
- Sole owner of multiple internal apps end-to-end: frontend, database, access control and operation — all vibe-coded with AI (Claude).

Shopee — Logistics Management Specialist *Aug 2021 – Feb 2025*

- Led performance analytics for 3PL partners (Vietnam Post, Viettel Post, J&T): built automated SQL + Google Sheets dashboards giving senior management and partners real-time KPI visibility.
- Improved partner pickup on-time performance (VTP) from 90.1% to 97.5% through rigorous data monitoring and structured partner collaboration.
- Redesigned shipping-status flows based on data analysis, reducing contact rate per order by 15–20% and improving customer experience.
- Developed automated reporting tools with Google Apps Script, cutting the team's manual workload by ~30%.

J&T Express — Key Account Specialist *Oct 2020 – Aug 2021*

- Partnered with Shopee's logistics department to operate high-volume order flows (~300,000 orders/day), using data to track initiatives and design delivery solutions.
- Implemented internal dashboards, tools and reports that standardized business metrics and enabled data-driven decisions for the operations team.

A.P. Moller Maersk — Export Care Business Partner *Aug 2019 – Sep 2020*

- Acted as strategic partner for export clients, coordinating with overseas agents and internal teams to execute shipments and resolve issues in a global environment.
- Maintained customer master-data accuracy to optimize internal systems and the end-to-end customer experience.

SKILLS

- **Data & Analytics:** SQL (Trino, large-scale e-commerce datasets), Python, Power BI, Excel / Google Sheets, dashboard design
- **AI & Automation:** Vibe coding (AI-assisted development with Claude: Next.js, React, Supabase, Vercel), prompt engineering, LLM agents & AI workflow design (MCP), n8n, Google Apps Script
- **Account & Operations:** Key account management, SLA & escalation management, demand forecasting, client consulting, cross-functional collaboration
- **Languages:** Vietnamese (native), English (working proficiency, TOEIC 600)

EDUCATION & INTERESTS

University of Finance – Marketing — Bachelor of Business Administration *2014 – 2018*

Interests: Badminton · Cooking · AI tools & science
